Here's a professional landing page for **Cherubims DBA Cherubims Security Services**, focused on construction site security with both armed and unarmed security guard services. The copy is designed to attract construction companies, general contractors, developers, and site managers.

Cherubims Security Services — Construction Site Security Landing Page

CHERUBIMS

SECURITY SERVICES

Protection You Can Build On.

CONSTRUCTION SITE SECURITY

Protect Your Site. Secure Your Investment.

Reliable armed and unarmed security solutions designed to help protect construction sites, equipment, materials, and personnel.

[Request a Security Quote](#)

[Explore Our Services](#)

Security Built Around Your Project

Every construction project deserves a security plan tailored to its location, operating hours, site conditions, and risk exposure.

Unarmed Security

Access control, visitor verification, site patrols, and incident reporting.

Armed Security

Armed security coverage for approved assignments where elevated security measures are warranted.

What We Help Protect

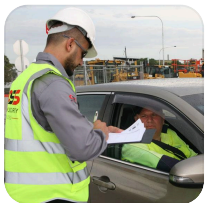

Construction Equipment & Machinery

Help deter unauthorized access, theft, and tampering involving valuable equipment.

Tools & Building Materials

Maintain awareness of materials, tools, storage areas, and delivery activity.

Site Access & Personnel

Help manage entry points, verify authorized visitors, and document unusual activity.

Your Site. Your Schedule. Your Security Plan.

From overnight coverage to around-the-clock assignments, discuss a security solution suited to your project's needs.

Visible Security Presence

A professional presence intended to deter unauthorized activity.

Flexible Coverage

Discuss day, night, weekend, and extended-hour coverage.

Site-Specific Planning

Build a coverage plan around your site layout and operational requirements.

Quote request section

Request a Construction Security Quote

Tell us about your project so Cherubims Security Services can assess your coverage needs.

Security services are subject to applicable licensing, legal requirements, and assignment-specific terms.

To make this a live website

I recommend a mobile-friendly, dark navy and gold design with a strong quote-request button, separate armed and unarmed service sections, and a lead form that sends inquiries directly to your business.

One question: Would you like me to build this as a **complete, functional website in Base44**, or are you looking for the landing-page text and design to give to your existing web developer?
